孫家伃 Sun Chia Yu

Indie developer • Front-end engineer

Age 26 • Taichung, Taiwan • erikawang1233@gmail.com • github.com/eriksun0310 • ptalkbusinessweb.vercel.app

Summary

Front-end engineer with 4 years of experience. I have shipped 10+ apps with React Native and build operator screens for factory machines.

Experience

Indie developer PTalk Studio

Apr 2025 – present

React Native | Expo | Phaser | Capacitor | RevenueCat

- Built and shipped 10+ apps on my own, covering the front end, product design and operations
- Sushi JLPT passed 10,000 downloads and 3,000 purchases, and I keep maintaining it from user reports

廣達國際機械有限公司 React front-end engineer

Mar 2024 – present

React | Next.js | TypeScript | Zustand | TanStack Query | three.js | Playwright

- Own the front end of 5 feature modules in that system, from screens and state management to data import and export, through release
- Built machine operator screens and web management systems with React and Next.js, updating live from PLC status and handling alarms
- Developed equipment management and production workflow modules: data tables and forms, 3D part viewer, DXF, Excel and PDF export
- Defined APIs and event streams with backend engineers to split front-end and back-end responsibilities clearly
- Built multilingual and light/dark UIs, and protected key flows with automated tests

凌成科技有限公司 Front-end engineer

Oct 2022 – Mar 2024

React | Redux | TanStack Query | RESTful API

- Built the front end of internal systems and project-based products with React, from requirement talks through release
- Turned business needs into front-end specifications and aligned with business and backend teams
- Integrated RESTful APIs and managed state and data flow with Redux and TanStack Query
- Improved the UI/UX and operating flows of existing systems to speed up users

Shipped apps

Sushi JLPT JLPT • Vocabulary

Six study modes for vocabulary. Answer right and fill your plate with sushi. **10,000+ downloads • 3,000+ purchases**

PTalk Pet-Friendly Map Lifestyle • Pet-friendly

See at a glance how pet-friendly a place is **2,000+ pet parents using it**

Ninbato JLPT • Listening, grammar

A ninja pigeon delivers listening practice, N5 to N1 in one app **1,500+ downloads • 200+ purchases**

Pizza TOEIC TOEIC • Vocabulary

Answer words right to collect pizzas on the way to a gold TOEIC certificate **1,000+ downloads**

KOKO Japanese • Conversation

Open the app and you are in Japan. Speak Japanese in 100 days.

Sushi Flip Game • Physics flipper

Swing the salmon, flick the knife and land it on the rice. Every level brings a new mechanic.

7 more apps are live. See the PTalk site for the full list.

Skills

Front-end core	React • Next.js • TypeScript • React Native • Expo • Zustand • TanStack Query • Tailwind • shadcn/ui • tables and forms
Real-time data and visualization	Real-time data streams • three.js • IFC 3D • DXF • Excel • PDF export • QR scanning • i18n
Games and physics	Phaser 3 • Matter.js • Computational geometry: exact slicing • Deterministic simulation and tuning • Procedural Canvas art • Sensor input: gyroscope • Automatic level checks and difficulty analysis
Mobile apps and release	Capacitor • AdMob • Native iOS integration • Purchases and analytics • Handwriting • maps • audio • Local-first • SQLite
Product and engineering habits	Product design and operations • Working with backend teams • Vitest • Playwright • Monorepo • Biome • Husky

Working with me

- **I own things end to end** I take a product from idea, design and code through release and operations, and have shipped 10+ apps. Sushi JLPT passed 10,000 downloads and 3,000 purchases, and I keep fixing it from user reports.
- **I keep the team aligned** At work I split API and event-stream responsibilities clearly with backend engineers and turn business needs into front-end specs, so nobody finds out halfway that we were heading different ways.
- **I protect what must not break** Machine screens must be live and correct, so I handle alarms and edge states first and guard key flows with automated tests. I also run Playwright over every level of my own games to confirm each one is solvable.
- **I learn fast across fields** I moved from a hospitality degree into front-end work and learned React Native, game physics and the release process by building products. When something is new to me, I get a working version first and then improve it.

Education

Hungkuang University • Hospitality Management • Bachelor — Sep 2018 – Jun 2022
